

# Easy-to-Use Service to Retrieve Domains That Share the Same Mail Exchange (MX) Server

## Retrieving MX associations should be fast and straightforward.

Obtaining a list of domains and subdomains using the same mail exchange (MX) server can be challenging, as it involves huge amounts of time, effort, and technical skill. Yet the data is critical to improving asset reconciliation, email deliverability optimization, and other cybersecurity and marketing processes. Organizations need access to a user-friendly reverse MX service that can immediately return MX server associations by gleaning data from a massive DNS database.

## Gain insights into MX connections better and faster with a top-notch reverse MX lookup service.

Our reverse MX lookup product line can provide a list of domains that share the same MX server address within seconds. The tools are connected to our comprehensive DNS database that contains billions of DNS records, with millions of MX records added or updated weekly. [Test](#) our reverse MX lookup service or [contact us](#) for more information.

## Practical Usage

Retrieve a list of domains and subdomains that share the same MX server to:

- Expand threat-hunting efforts by retrieving domains and subdomains associated with a known malicious MX server
- Safeguard email deliverability rates by avoiding malicious MX servers and suspicious MX associations
- Regularly check MX records to avoid dangling DNS records that threat actors can exploit

**Billions**  
of DNS records

**774M+**  
domains tracked historically

**4.2B+**  
domains and subdomains

## What Data Points Are Included?

Our reverse MX service searches our extensive DNS database for domains and subdomains that use the same MX server address. See the table below for the data points it returns.

Type of Validation	Description
Domain name	Refers to the domain or subdomain connected to the MX server
Date first seen	The date when the connection was first detected
Date last updated	The date when the domain's MX record was last updated

## What Reverse MX Service Delivery Models Do You Provide?

Delivery Model	Update Frequency
Reverse MX Lookup	Real-time
Reverse MX API	Real-time
Reverse DNS Search	Real-time
DNS Database Download	Daily, weekly, monthly

## About Us

WhoisXML API aggregates and delivers comprehensive domain, IP, DNS, and subdomain data repositories. We have more than 52,000 satisfied customers from various sectors and industries, such as cybersecurity, marketing, law enforcement, e-commerce, financial services, and more. Visit [whoisxmlapi.com](https://whoisxmlapi.com) or contact us at [sales@whoisxmlapi.com](mailto:sales@whoisxmlapi.com) for more information about our products and capabilities.
